# EPP RFC Updates

Jaap Akkerhuis
(Channeling Scott Hollenbeck)

# Process

- Discussion on old WG mailing list, *ietf-provreg@cafax.se*

- Public confirmation of known issues noted since RFCs published in May 2004

- Any new issues?

- New -00 I-Ds published September 2005

- More discussion, interop event/report, then hopefully Draft Standards

# RFC 3730bis

- EPP core spec
- XML and other reference updates
- Relaxed service message MUST text
- Minor error corrections

# RFC 3731bis

- EPP domain name mapping
- Removed pending* status <update> restriction
- Corrected <update> element requirement
- Relaxed service message MUST text
- Updated references

# RFC 3732bis

- EPP host mapping
- Removed pending* status <update> restriction
- Relaxed host object <delete> restriction
- Corrected <update> element requirement
- Relaxed service message MUST text
- Updated references

# RFC 3733bis

- EPP contact mapping
- Removed pending* status <update> restriction
- Fixed examples
- Corrected <update> element requirement
- Relaxed service message MUST text
- Updated references

# RFC 3734bis

- EPP TCP transport
- Updated references

# To Do:

- Finish document updates
- Conduct interoperability test (need at least two independently-developed implementations)
- Write interoperability report
- IETF review and approval to advance from Proposed to Draft
