- Read the Manual, or just start (you have been warned)

Men & Mice Certification Help

This DNS Guru Test for the RIPE 51 Meeting is a special version of the Men & Mice DNS and DHCP Certification Test.

The original Men & Mice Certification Tests contain 120 Questions to be answered in 60 Minutes.

You have 15 minutes time to answer the 30 questions in this quiz. The Timer will start once the first question appears on the screen. On the bottom of each page you can see how much time is left. When the time is over, the Application will present the results.

To pass the DNS Guru Test, you must score 80% of the possible score in the test. The questions for the test are randomly choosen from a set of questions. You can skip and mark a question anytime to answer that question later. The navigation section on each question page will give you an overview on which questions are already answered, which are visited and which are marked. It is possible to directly jump to each question during the test.

If you navigate to another question with the navigation section, make sure that you first save the currently shown question.

If you have any comments to the test or the questions, please use the comment field on the question page.

RIPE 51 DNS Guru Quiz

Tutorial

- Try to answer the 30 Questions

Question 10/30:
What happens if a trailing dot is missing in a FQDN in a Zonefile?

○ an extra domain (the origin) will be appended in the ownername or in the RDATA Section
○ BIND will refuse to load the zone
○ BIND will refuse to load this line and will write a warning to a logfile
